Fromage a la Creme.

To one-half cup of the cheese add one-half cup of cream, stiffly beaten, cutting it in lightly. Pile it roughly in a border on the serving dish, and put raspberries or strawberries, fresh or cooked, in the center.

CURIOUS BITS OF HISTORY

By A. W. Macy.

AN ALBINO KING OF ENGLAND.

It is quite probable that England once had an albino for a king. Edward the Confessor, who reigned from 1042 to 1066, is said to have had long hair and beard, both as white as snow. His skin was of a milky color, and his face inclined to rosy. His hands were long and very white. An albino always has a skin of a milky hue, with hair of the same color, and eyes with deep red pupil and pink or blue iris. These peculiarities are said to be caused by a deficiency of certain coloring matter in the blood. The name albinos was first given by the Portuguese to negroes they found on the African coast who were mottled with white spots. Albinos are found, however, among all races of men, and also among some of the lower animals, as mice, elephants, etc. From the descriptions of King Edward's personal appearance that have come down to us, and which are evidently reliable, it is reasonably certain that he was an albino.

Baked Batter Currant Pudding.

This pudding, if correctly made, is both tasty and digestible. Take a quarter of a pound of flour, four ounces of cleaned currants, three eggs, and one cupful of milk, and make into a light batter, then add a teaspoonful of baking powder and a pinch of salt. Pour into a well-buttered pudding dish, sprinkle in the currants, and bake in a moderate oven for about one hour. When baked, turn out the pudding and cut up. Serve with sugar or with golden syrup.

Not Certain.

"On what plane would they put an aerial army corps?"
"Hard to say. They might decide on an aeroplane, and then again, they might prefer a biplane."

Feeding Rye.

Rye in early summer is a good feed, but will not solve the feed question. It should be followed quickly with a mixture of wheat and other crops in succession.

The Fuel Supply Needs Attention Only Three Times Each Day

The makers of Cole's Hot Blast Heater guarantee this stove to hold fire with soft coal 36 hours without attention. Your old stove and imitation stoves leak air and waste fuel because they are not air-tight, because they have putty joints.

Cole's Original Hot Blast Heater

—by means of the patented Hot Blast Draft and other patented features which make it tight, doing away with the use of stove putty—requires less attention than any other heater made.

All fuel—Soft Coal, Hard Coal, Lignite, Wood or Corn Cobs—contains a large amount of gas. Fully one-half of the heating power (carbon) in soft coal is gas. This is the part of the fuel this wonderful heater saves, by burning it with the Top Hot Blast Draft. This makes Cole's Hot Blast Heater the most satisfactory, the most economical, the most convenient heater you can buy. Imitations and other styles of stoves allow this gas-half of the coal to pass up the chimney with the smoke, unburned.

Thousands of these stoves are in use and the sale continues to increase year after year.

This heater will give you more comfort than you ever thought possible by using any kind of a stove which uses soft coal for fuel.

Right now is the time to decide and select the size you should have. Come in and see complete line of styles and sizes.

No Stooping While Baking With Cole's Sanitary High Oven

Think of the advantages this Elevated Oven affords as compared to the old-fashioned cook stove or cast iron range.

The oven is on a level with the shoulders—so you have no lifting, no stooping, no steam or odors to inhale when baking in Cole's High Oven Range. You can operate the oven in a comfortable, erect position.

The natural course of heat is to rise. We have taken advantage of this and have placed the oven high instead of down low.

The heat rises around all four sides of the oven evenly. All sides are heated alike. Your baking will not be over-baked on one side and half-baked on the other. The temperature of the oven can be changed in less than a minute, yet you can keep it the same for over two hours on one charge of fuel—so perfect is the fuel combustion.

Every atom of heat is utilized, due to our patented Hot Blast Combustion (which burns the wasting gases) and to the patented air-tight construction, giving a great saving in fuel.

Cole's High Oven Range

equals the work of ranges which cost twice as much. This New Improved Cooker and Baker is a money saver for you to use. It will save fuel and will lessen your work—you have only one fire to give attention, 2 drafts to regulate, no dampers—it's simply a wonder. Let us show you its many good features which were made to please particular housewives.

CURIOUS BITS OF HISTORY

By A. W. Macy.

SHAYS' REBELLION.

One of the most perilous times in the history of the United States was the period just after the close of the Revolutionary war and before the government had become firmly established. Every community was inclined to be a law unto itself. Even in puritanical Massachusetts there was a little rebellion against the state government that looked serious for a time. It is known as "Shays' Rebellion," taking its name from one of the leaders, Daniel Shays, who had been a gallant officer in the War for Independence. The grievances were, the large salary paid the governor of the state, the aristocratic character of the state senate, and the burdensome taxes. The rebellion lasted from August, 1785, till the following February. Shays had a large following, and there were several conflicts with the state militia. The opposing forces, however, evidently did not get dangerously near each other, for only three men were killed during the entire "war." The leaders were tried and convicted, but were eventually pardoned. Shays lived till 1825, and in his old age was pensioned for his gallant services during the Revolution.

Their Only Use.

"Do you enjoy your meals, old man?"

"Do I enjoy my meals?" snorted the indignant dyspeptic. "My meals are merely guide-posts to take medicine before or after."
